Subject: Final Memorandum: Hardness-Based Chronic and Acute Manganese Ecological PRGs for Water
Attachments: Hardness-based Mn Criterion Memo_FINAL_25 November 2014.pdf

Kristine,

Per our discussion during the November 18 Project Managers meeting, Windward has made final edits to its memorandum titled *"Derivation of Final Manganese PRG to Replace the Suter and Tsao (1996) Tier II Value in the Portland Harbor Feasibility Study"*. The edits were limited to removing "draft" from the title, updating the date of the memorandum, and removing the standard LWG footer for draft documents. Attached is the final version of the memorandum.

Please contact me if you have any questions.

Thanks,

Jim McKenna
